Aspiring Penetration Tester | Cybersecurity Enthusiast

SUMMARY

Self-taught cybersecurity practitioner focused on offensive security. Hands-on experience with reconnaissance tooling, web application testing, and building composable utilities for security work. Strong documentation habits; publishes tools and writeups publicly for review.

TECHNICAL SKILLS

- Reconnaissance: nmap, subfinder, amass, httpx, Shodan, OSINT workflows
- Web Application: Burp Suite, OWASP Top 10 (SQLi, XSS, SSRF, IDOR, auth flaws), ffuf, SQLMap, Nikto
- Scripting & Tooling: Python, Bash, regex, modular CLI design
- Infrastructure: Docker, Vagrant, Proxmox, Linux administration
- Reporting: Markdown, structured JSON/TXT output, Telegram alerting

SELECTED PROJECTS

Sentinel — Open-source offensive security framework

2025 – present · github.com/Zigha08/sentinel

- Modular architecture for recon, scanning, reporting, and alerting.
- Persistent logging; structured JSON + human-readable TXT reports.
- Local lab server (Flask) shipped for safe verification.
- Automated weekly tar.gz backup via cron job.

AI Coding Team — Multi-agent coding pipeline

2026 · github.com/Zigha08/ai-coding-team

- Orchestrator decomposes tasks into ordered steps; specialists execute per step.
- Reviewer loop with bounded iteration; conservative type coercion on JSON.
- Defensive retry: transient errors only, exponential backoff.
- Security pass with chunked audit for large codebases.

Vulnerable Login Lab — Safe practice target

2025

- Intentionally vulnerable Flask app for testing scanner outputs and learning auth bypasses.
- Self-hosted in isolated VM; never exposed to public networks.

EDUCATION

Self-directed study in offensive security

Ongoing

- OWASP Web Security Testing Guide (full)
- HackTheBox & TryHackMe practical rooms (in progress)
- PortSwigger Web Security Academy labs
- TCM Security Practical Ethical Hacking coursework

LANGUAGES

- Indonesian (native)
- English (professional working)

AVAILABILITY & PREFERENCES

- Open to junior penetration testing roles, internships, and security tooling collaboration.

- Remote or on-site; based in Indonesia, open to relocation.
